Contact Information:

City Project Manager: Max Kashanian, Project Engineer

Phone: (805) 564 - 5450

E-mail: MKashanian@SantaBarbaraCA.gov

Contractor: Granite Construction Company and Valley Slurry Seal Co.

Project Description: Pavement Preparation and Slurry Seal

Each year the City of Santa Barbara contracts the maintenance operations to repair the streets in a designated area. The Pavement Maintenance Program includes pavement preparation, crack seal, and slurry seal to allow the streets to continue to be in a safe and usable condition.

This year Granite Construction will proceed with the Pavement Preparation, which includes grinding the damaged pavement and placing new asphalt. Valley Slurry Seal will fill or seal the cracks then place slurry to renew the driving surface and protect the integrity of the road surface.

An example of operation method for slurry seal Project:

Work shall be performed in "Zone 3", Waterfront parking lots and City Airport. Residents shall be notified as each operation enters the area and general information is available on the City web site. Construction commenced on June 15, 2009 and is anticipated to be completed by mid September.
